TERMS AND CONDITIONS

Acceptance of Terms

In 2016, the Equine Microchip Lookup Tool™ was created by Microchip ID Systems, Inc. and other stakeholders in the equine, veterinary and animal health industries. As the participation in the 'Tool' grows, member databases will be listed on the site. The EMLT provides a cloud based search engine to assist in locating the source of a microchip found in a horse or other equine. Any microchip number can be entered into the search window of the site. If the microchip number is located in a Participating Member database, further tracking information will appear.

Note: To protect the privacy of equine owners, personal information is not provided. Instead the EMLT™ will direct queries to the participating company, registry, database or service containing the actual owner information. Additionally, telephone support is provided 7 days a week.

The EMLT is designed to fast-track a nationwide search to connect a particular microchip number in a particular horse to a particular owner, facility or database, depending upon the situation. The Tool works by searching the databases of Participating Members who have elected to join the search engine platform.
